

RESEARCH SUMMARY

Research title: A study on the risks of Vietnam's garment exporting to the U.S. supply chain.

Students: Nguyen Thi Bich Ngoc, Nguyen Thi Hong Van

Class: QH-2008-E International Economics

Instructor: Assoc.Prof.Dr. Ha Van Hoi

Prize: Third Prize at unit level, 2011

Objectives:

The research wants to clarify the following matters

- The overview of Vietnam's textile industry.
- The overview of Vietnam's garment exporting to the U.S. supply chain.
- The risks of Vietnam's garment exporting to the U.S. supply chain.
- Evaluation and forecast of the risks; method of controlling and limiting the risks in the future on enterprise scale in particular and on the textile industry scale in general.

Main contents:

- Chapter 1: The overview of the research.
- Chapter 2: Scientific basis of studying the risks of Vietnam's garment exporting to the U.S. supply chain.
- Chapter 3: Analyzing the risks of Vietnam's garment exporting to the U.S. supply chain.
- Chapter 4: Measuring and forecasting the risks of Vietnam's garment exporting to the U.S. supply chain.
- Chapter 5: Conclusion and further research direction proposals.

Results obtained:

After the research progress, we have achieved the results including:

- Theoretical overview of supply chain, risks of supply chain and risk measuring method.
- The overview of Vietnam's garment exporting to the U.S. supply chain.
- The risks of Vietnam's garment exporting to the U.S. supply chain.

- Methods of measuring and evaluating risks of supply chain in the future of textile industry.
- Methods of controlling and limiting risks in long term.
- Further research proposals.
